makerlab@Ham

Who we are

We are mostly local people with an interest in computers and electronic technology. We have all different levels of ability and experience, some just want to learn new skills.

There are no barriers to joining us, just come along to listen, watch or make something.

What we do

We aim to create things that work, from things that don't work, like old computers, broken machines or faulty goods.

We can help you assemble your own computer from second-hand parts, at no cost at all. Build it and keep it if you want.

We also aim to develop new ideas, making gadgets useful to the local community.

Where to find us

We are right in the heart of Ham, at Little House in Ham Close.

We meet on all Tuesday evenings from 7.30pm until 10.00. That's the best time to come along and meet us for the first time.

We also meet at Little House on some Wednesday evenings and occasional Thursdays too. Those times are for specific projects.
